□□□□□□□□□Reactome, BH<0.05□
Classical antibody-mediated complement activation
Creation of C4 and C2 activators
Initial triggering of complement
Regulation of Complement cascade
Interleukin-10 signaling
Complement cascade
Respiratory electron transport
Malate-aspartate shuttle
Aerobic respiration and respiratory electron transport
Signaling by Overexpressed Wild-Type EGFR in Cancer
Inhibition of Signaling by Overexpressed EGFR
EGFR interacts with phospholipase C-gamma
Processing of Capped Intron-Containing Pre-mRNA
NFE2L2 regulating tumorigenic genes
Metabolism of RNA
GRB2 events in EGFR signaling
mRNA Splicing - Major Pathway
Developmental Lineage of Mammary Gland Myoepithelial Cells
SHC1 events in EGFR signaling
mRNA Splicing
GAB1 signalosome
Estrogen-dependent nuclear events downstream of ESR-membrane signaling
mRNA Polyadenylation
Transcriptional regulation by the AP-2 (TFAP2) family of transcription factors
concordant (15)
